

Net2Phone VoiceLine

Provide both small business and residential broadband users with a U.S. or U.K.-based telephone number and enable them to save on both inbound and outbound calling.

With the Net2Phone VoiceLine service, you can:

- Target both the small business and residential markets
- Provide a feature-rich, low-cost calling service
- Offer a variety of calling plans

The VoiceLine Service

Now your broadband customers can benefit from having a U.S. or U.K. telephone number, no matter where they reside globally. Customers can choose from U.S. toll-free, U.K. toll-free and a wide selection of U.S. local numbers, including New York metro, Los Angeles, Chicago and Miami-based numbers.

In addition to a VoiceLine account, users will need an InnoMedia MTA 3328-2 VoIP telephone adapter to place and receive calls using the VoiceLine service.

Low-Cost Inbound and Outbound Calling Plans

VoiceLine is a pre-paid service that enables users to save on both inbound and outbound calling. Features designed to meet the needs of various small business and residential users include:

- Unlimited calling plans (inbound and outbound)
- Fixed / "bucket of minute" calling plans
- Pay as you go plans, featuring per-minute calling rates
- Value-added features such as:

VoiceMail
Caller ID
Call waiting
Call transfer

Automatic callback
Call blocking
Auto-recall
Three-way conference calling

Market Opportunities

Anyone who receives calls from the U.S. or U.K., and especially those who also make international calls, can benefit from the VoiceLine service. Potential customers include:

- **Companies located outside the U.S.**, who can utilize VoiceLine to establish a U.S. presence. For example, a company with customers inside the United States could obtain a U.S. telephone number for service and support. Since the process is seamless, callers will have the same experience as they would calling any number in the U.S.
- **Residential broadband users**, who can drastically reduce their communication costs with family, friends and business contacts in the U.S.

And, the VoiceLine service is easy to monitor through the on-line account center which allows users to view call history data and manage their account and calling features.
