

Maximize Value

Off-Net to Off-Net Calling

Use any phone to call through the Max and save on calls to any location. Perfect for off-site users, including:

- Employees who are traveling
- Employees working from remote, home or satellite offices
- Employees working after hours from home

As an added bonus, you can save even more by making international long distance calls at local rates wherever you have a PVN presence.

OFF-SITE USER

1. Off-site user dials PSTN phone number into FXO port of Max gateway.
2. Caller receives dial tone and dials the appropriate outside (POTS) telephone number.
3. Max gateway sends call request message to PVN server.
4. PVN server authorizes call.
5. Call is forwarded to the Net2Phone platform where the enhanced services application is determined. The Net2Phone gateway then delivers the call request.
6. Call terminates at destination phone.
