

# Maximize Value

## Off-Net to On-Net Calling

*Off-site users can use any phone to call others on the PVN network. Perfect for:*

- Employees working from remote, home or satellite offices
- Traveling employees
- Employees working from home after hours

1. Off-site user dials PSTN phone number into FXO port of Max gateway.
2. Caller receives dial tone and dials the appropriate PVN extension.
3. Max gateway sends call request message to PVN server.
4. PVN server authorizes call.
5. Call is delivered to an extension on the PVN network.
