

# Maximize Value

## On-Net to On-Net Calling (Inside Office)

*Employees in the same office can easily communicate with each other via the Max PVN*

1. Caller simply dials the extension number of the party they wish to call.

2. Max gateway sends call request message to PVN server.

3. PVN server authorizes call.

4. Call is delivered to an extension on the PVN network (for example, ext. 1002).
