

## ***VoiceAccess enables corporations to quickly and easily reduce their telecommunication costs***

***The VoiceAccess business trunking solution enables you to:***

- ***Drastically reduce your outbound and inbound calling costs***
- ***Seamlessly add VoIP calling to your existing PBX***
- ***Utilize a phone number from the U.S. or select countries***

### ***Reduce Your Telecommunications Costs***

*VoiceAccess integrates with existing legacy PBXs and key phone systems to deliver the benefits of VoIP to businesses. With VoiceAccess, companies are able to very easily implement VoIP calling.*

### ***How VoiceAccess Works***

- *Select a plan that best fits your calling patterns:*

#### ***Outbound Only***

*Offers low outbound calling rates to destinations all over the world*

#### ***VoiceAccess Basic***

*Provides both low cost inbound and outbound calling*

#### ***VoiceAccess Plus***

*Includes all the features of the basic service plus VoiceMail and Call Forwarding, ensuring that you never miss a call should your IP connection fail*

- *A telephone adapter or gateway is connected to your existing network to enable VoIP calling. You can utilize one of the many hardware products offered by Net2Phone or select devices from companies such as Linksys, Quintum, Cisco, Audio Codes and Sipura.*
- *A telephone number is associated to your VoiceAccess account to enable inbound calling. You can choose phone numbers from a variety of countries, including:*

***U.S.  
Australia  
Belgium***

***Brazil  
Canada  
Chile***

***France  
Israel  
Netherlands***

***Poland  
Portugal  
Spain***

***Sweden  
Switzerland  
U.K.***
